SWARTKLIP COMBINED SCHOOL LIFE SCIENCE STUDY GUIDE HANDOVER

1. ABOUT THIS REPORT

2. A NOTE FROM XAKWA FOUNDATION

3. SWARTKLIP COMBINED SCHOOL LIFE SCIENCE STUDY GUIDE HANDOVER

1. ABOUT THIS REPORT

Swartklip combined school is a MST (mathematics, science and technology) government school. The school is situated in the peri-urban farm in Delmas. In the endeavour to bridge the skills gap in the country and beyond, the department of education introduced mathematics, sciences and technology in a few selected schools in the Mpumalanga province. The department deliberately chose the previously disadvantaged and less privileged societies so as to empower, eradicate poverty and crime among these communities.

2. PROBLEM STATEMENT

The school principle at Swartklip reached out to Masingita Colliery for assistance with study material that is greatly needed by their matriculants. A total of 100 study guides was what was requested. These books will have a positive impact not just on the matriculants of 2023 but also those of years to come. Resources to support the students are extremely limited which has led the school to seek donations from businesses and mining houses around the Delmas area. A vast majority of the school population is of children who come from Historically Disadvantaged Areas therefore making it nearly impossible for their parents to not only feed them, buy school uniform and provide adequate stationary.

A NOTE FROM XAKWA FOUNDATION

Our reports cover the Mine's social responsibility progress, implementation, and level of commitment as contemplated in the mining charter. We report on SED and ESD projects for the mine on an ongoing basis through-out the mine's life span. As a responsible corporate citizen we advocate for impactful social, environmental and educational participation. **XAKWA FOUNDATION** creates positive social change through socio-economic empowerment of underprivileged communities around the mine's operational radius. The elderly, the disabled, school children from challenging backgrounds, orphans, registered NGO's and generally vulnerable members of society are our primary focus group and we are dedicated to assisting the mine in making a meaningful change, and strengthening relationships with its stakeholders.

This impact report documents Masingita's 4th SDP initiative since the opening of the mine. Through our business case studies we were in a position to formally introduce Masingita's project to the mayor, LED Office, councillors, the department of Education, community leaders in Delmas.

Stakeholders in attendance at the drive was the CLO, the Xakwa Foundation Team, HOD Dpt Education, Councillor who was attended on behalf of the mayor. The Delmas Department of Education Circuit manager, a mine representative from Masingita

CHALLENGES AND FINANCIAL SHORTFALL

Costs for the Xakwa Foundation team to do research, consultation and implementation of these drives are a big challenge for the team. For us to fully PR the mine's great initiatives is greatly impacted by our planning and the turn around time in which the mine can support. We have learned that stakeholders who hold significant positions can be demanding at times when we need their corporation and often when we have these drive, catering food/refreshments has become a must. We need to factor in these elements to successfully pull off these initiatives. Very key is post activity consultation. It has become increasingly vital that we keep in touch and monitor where we have assisted. Stuff like food parcels can easily run out without us being prepared for the next drive. Items such as books which we supplied also need for us to monitor closely if they are being properly cared for and used. Suffice to say that all these are operational costs that impact the bottom line of what we do and in need of your consideration.
